We specialize in solar hot water systems

EAGLESUN™ by Alternate Energy Technologies (AET)

AE- Series Solar Collectors <http://www.aetsolar.com>

Since its introduction in 1987 the AET AE-Series **EAGLESUN™** has set a new standard in solar thermal collector excellence. Available in a wide range of sizes and models the AE collectors offer excellent performance and structural integrity. AE-Series collectors have been successfully utilized in all facets of residential, commercial and industrial applications. This is a long lasting solar appliance.

Solar Costa Rica Solar Hot Water Systems:

- Will resist the worst weather conditions on the rooftops of the tropics and can withstand hurricane winds of 180 mph (289 km/h).
- Will allow you to immediately lower your energy costs so you will immediately start to benefit from your investment and you should expect to pay for the solar hot water system by savings in about 4 years.
- AET collectors have a life expectancy of 30 years, and even then they can be easily serviced and repaired.
- **AET collectors have a 10-year guarantee**; in addition AET is the only manufacturer to **guarantee the critical inner welding for 30 years**. **Solar Costa Rica's installation is guaranteed for 1 year plus one month.**

Solar Costa Rica provides professional solutions by offering you the highest quality residential and commercial solar products and installations.

We'll give you a call to set up a site visit to see if Solar Power is for you.
